

Physical Education / Games

Inside – Dance – to explore a range of movement and incorporate twists, jumps, levels, balances, travelling and gestures into a sequence of dance.

Outside – CM Sports lead activities, invasion, net and wall and athletics.

French

Ma Famille (My family)- In French, the children will be learning how to introduce family members, learning to use 'il/elle s'appelle' (he/she is called) using the Language Angels programme. They will also be completing lots of fun activities and games to improve their listening and speaking skills in French.

Design and Technology

The children will research different types of lighting. Using this information, they will design and build their own lamp post in the style of that which was found in Narnia. They must incorporate an electrical circuit in their world, which links to elements of their science work. They will think specifically about creating switches, motors and storing the components safely.

Computing:

Children will learn to use photo editing in our digital creativity unit. They will use their acquired skills when creating a publication to design an imaginary place which will become the front cover to their Theme books. They will then learn the basics of what a computer network is and how the internet works.

Religious Education:

The children will consider and evaluate the concept of 'Holy' and learn what the word means to Christians and how they believe Mary to be Holy. They will also learn how they can relate the concept of "Holy" to their own lives. The children will also learn about the concept 'Creation'. They will look at creation stories and how creation stories are important to Christians.

PSHE:

The children will continue to learn about the diverse family structures, focussing on the fundamentals of healthy relationships between family members. They will then learn about how to maintain healthy habits to limit infections, how to communicate how they are feeling in order to recognise early signs of illness. Through practical workshops the children will learn to perform basic first aid and when to contact the emergency services.

History:

The children, through reading The Chronicles of Narnia, will learn about how life differed at various points in modern history. This will include what children's lives were like at the turn of the 20th Century and as evacuees in WW2, leading nicely into our next theme.

Music:

The children will learn about Mozart and create a graphic score of one part in a piece of music. They will focus on recognising staccatos and learn how an aria expresses the emotion of the characters. Ken (a volunteer) will support children's learning of how to play the ukulele. Each class, on rotation, will access this exciting opportunity.
