

You can play this game with another person. If you play it with a younger sibling, then you might have to help them with the rounding.

You will need a card each. If you cannot print this then write it out into your book. Follow the instructions in the left-hand column and then the right-hand column.

You could play it more than once. Maybe do the best of 3.

Player 1

Throw the dice	My number	Round it
Twice - put the first digit in the units column and the second one in the hundredths column		To the nearest whole number
Twice to make a two digit whole number		To the nearest 10
Three times to make a three digit whole number		To the nearest 100
Four times to make a four digit whole number		To the nearest 1000
Now add up the columns - who has the highest total in your group and is the winner?		

Player 2

Throw the dice	My number	Round it
Twice - put the first digit in the units column and the second one in the hundredths column		To the nearest whole number
Twice to make a two digit whole number		To the nearest 10
Three times to make a three digit whole number		To the nearest 100
Four times to make a four digit whole number		To the nearest 1000
Now add up the columns - who has the highest total in your group and is the winner?
