

## Create a board game project

As you might be finding it difficult to keep your mind busy whilst staying at home for such a long time, I would like you to use your creativity and imagination to help you design a mathematical board game.

### Instructions

Your board game must;

- have a mathematical element to it
- have a game board to play on that is attractive and colourful
- include instructions on how to play the game
- play the game with your family!

Good luck, I look forward to seeing your finished games.
